Figma and Adobe XD etc.

— — —

Below are a few of my designs ranging from:

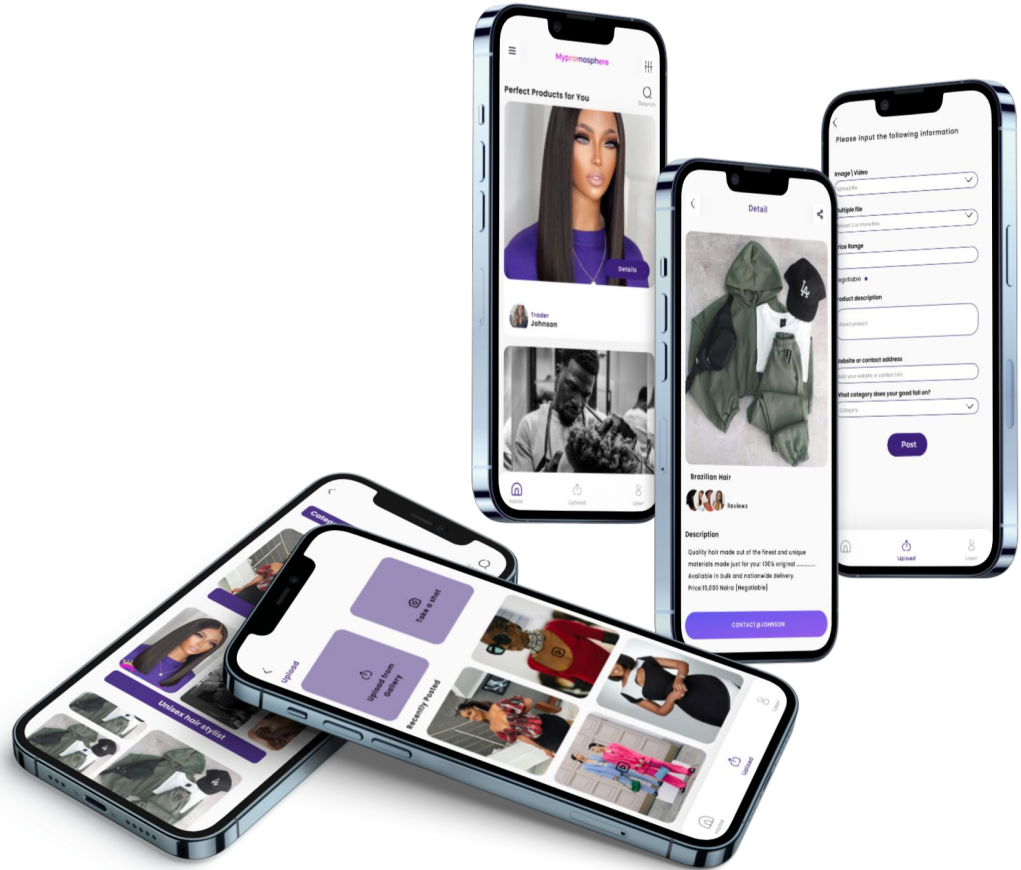

— — —

- E-commerce app
- Art history app
- Clothing brand sales app
- Mobile banking app

ps:These are just illustrations of the main designs.please click the figma links to see full designs of the products.

E-commerce App

The E-commerce app is a mobile app which offers features which allows users to buy and sell goods and services in a very simple and entertaining way. the app allows Buyers to connect with with verified sellers directly on the app it also allows other services which includes following of your favourite traders, one on one connection with services providers amongst other features. [Figma link](#)

Art History App

— — —

This is an art history app that serves as both an educational and entertaining app for users.

The app offers a wide search feature which allows users get their desired search easily and to crown that up ,it provides in-depth information of the search which would also interest art lovers.

It offers features ranging from allowing users own accounts and also allows the sales of art works within artists.and the app has a responsive website.all these are just to mention but a few of the app's functionalities.[Figma link](#)

Clothing brand sales app

The Commonyouth app allows users make online purchase of their favorite attires from the brand owners of common youth.

It allows users specify on their orders ranging from colours,sizes and even fittings.

It is also secure to users and doesn't need too many informations that might inconvenient the users. Also,the app offers a discount price for bulk buyers and some products are also negotiable to meet the budgets of potential users.[Figma link](#)

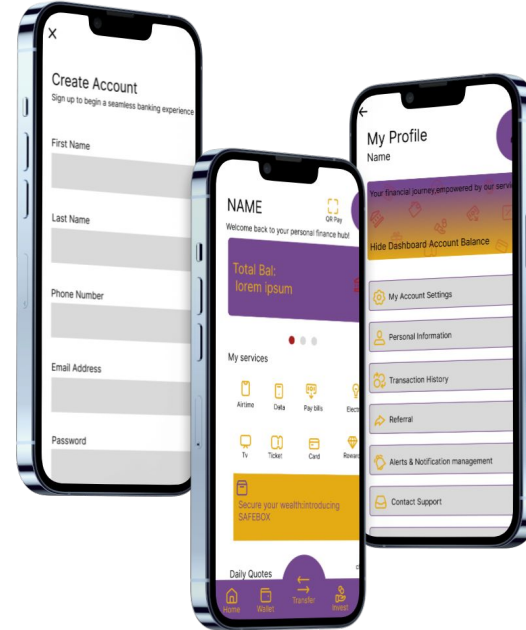

Mobile Banking app

This mobile banking app allows users make basic financial transactions via an easy to follow steps which the app provides.

The app allows the purchase of movie tickets,airtime/data, utility bills etc.

The app uses the most flexible informations to allow users access to it.

Contact
